

Electricity Contracting in Tasmania's Deregulated Market Plus, Renewable Energy Options for the Dairy Industry

WORKSHOP TOPICS INCLUDE:

- Factors influencing Tasmanian contract prices.
- How to access information
- Contracting strategy – do you take the first offer?
- What terms are negotiable?
- Being ready to accept an offer – timing of entry into the contract.
- How to compare the contract offer with other offers and the current Grace Period tariffs.
- How to approach Retailers.
- The implications of 1,2 and 3 year contracts.
- Aggregating metering to reduce costs.
- Where to get independent advice
- Electricity generation using Wind turbines of sizes ranging from 2kW to 300kW
- Opportunities for hot water heating using solar
- Opportunities for hot water heating using heat pumps

If you spend around \$25,000 or more per annum on electricity, you need to know How to Negotiate your new Electricity Contract, and the Renewable Energy opportunities facing Tasmania's rural consumers.

This free workshop is designed to address the needs of Tasmania's contestable Dairy industry electricity customers (sites consuming >150MWh per annum). Expert speakers include Marc White, Principal Consultant, Goanna Energy Consulting. With over 27 years of energy industry experience, Marc has negotiated energy contracts up to \$100m in value. Plus Paul Fulton, Manager, Joule Logic Energy Advisors. Paul was previously the Technical Manager at large international wind farm development company and has extensive experience in all stages of wind farm development, including: site prospecting, wind monitoring, transmission connection, wind turbine procurement, operations and maintenance.

Bookings are essential. To register contact DairyTas.
